

A SHARED MEASURE FOR THE NEXT GEN GLOBAL COLLAB

How are young people following Jesus — and where do they stop moving?

The JFINDX (the Next Gen Jesus-Following Index) is one short, anonymous survey that any ministry can run with the young people it reaches, aged 13 to 30. Every ministry sees its own results the moment people answer. Together, the Collab sees a picture no single ministry could see alone.

THE MODEL · THREE QUESTIONS, FOUR TIERS

Every question in the survey belongs to one of **three questions** — what we measure — and one of **four tiers** — how deep it has gone. That makes a grid of twelve cells, the **J12**. Reading across a row shows where young people stop moving: the columns narrow as faith goes from being heard of to being passed on.

	EXPOSURE	RESPONSE	FORMATION	MULTIPLICATION
Follow personal faith	heard of Jesus	believes	being shaped	helps others believe
Mission outward	aware of the call	convinced it's theirs	practising witness	mobilising others
World lived impact	sees faith should matter	believes it does	choices reshaped	changing their spheres

WHAT IT TAKES

About 7 minutes

One question per screen on any phone. A 3-minute short version is available for camps and busy moments.

Anonymous by design

No names, emails, precise location or IP addresses. Age is a band, never a birthday.

Works with no signal

Once the survey has opened on a phone, it runs offline and sends answers when signal returns.

HOW IT WORKS

1 A ministry joins

Sign in at jfindx.org with your ministry email — no password. Your organisation gets its own branded survey and dashboard.

2 Make a link for each group

Each link is its own “room” — a camp, a youth night, a partner church — with its own open and close times. Every room rolls up into your whole organisation.

3 Young people answer

They scan a QR code or tap a link, answer in about seven minutes, and are told plainly that only grouped results are ever seen.

4 You read the J12

Your dashboard shows the J12 matrix and a world heat map, and lets you overlay your whole organisation on the Collab's pooled picture.

5 Ask what it means

“What does this mean?” sends your question — and the view you are looking at — to a Collab facilitator, who helps turn a score into a changed strategy.

THE PROMISES THE PLATFORM KEEPS

- **Only “those who have completed the Index.”** Results never claim to describe a whole population.
- **Nothing small enough to point at a person.** A score appears only once at least 10 people have answered; a country appears on the map only at 2,000.
- **Aggregates only.** No organisation ever sees an individual's answers — including its own young people's.
- **Your brand, not ours.** Respondents see your name, colour and logo; the JFINDX sits quietly in the footer.
- **Never locked.** The questions belong to the researchers and are versioned; every answer stays tied to the version it was given under.

Start at jfindx.org

Sign in with your ministry email to set up your organisation, or take the guided tour at jfindx.org/tour to see every screen with invented figures first.
