A SHARED MEASURE FOR THE NEXT GEN GLOBAL COLLAB

How are young people following Jesus — and where do they stop moving?

The Jesus Index (the Next Gen Jesus-Following Index) is one short, anonymous survey that any ministry can run with the young people it reaches, aged 13 to 30. It's free for every ministry. Each one sees its own results live, as people answer. Together, the Collab sees a picture no single ministry could see alone.

THE MODEL · THREE QUESTIONS, FOUR TIERS

Every question in the survey belongs to one of **three questions** — what we measure — and one of **four tiers** — how deep it has gone. That makes a grid of twelve cells, the **J12**. Reading across a row shows where young people stop moving: the columns narrow as faith goes from being heard of to being passed on.

	EXPOSURE	RESPONSE	FORMATION	MULTIPLICATION
Follow personal faith	heard of Jesus	believes in Jesus	being shaped	helps others believe
Mission outward	aware of the call	convinced it's theirs	practising witness	mobilising others
World lived impact	sees faith should matter	believes faith matters	choices reshaped	changing their spheres

WHAT IT TAKES

About 6 minutes

One question per screen on any phone. Choose the J12 (about 5 minutes) or the Full survey (about 6, plus optional extras).

Anonymous by design

No names, emails, phone numbers or birthdays; IP addresses are never stored with answers. Age is a band.

Works with no signal

Once the survey has opened on a phone, it runs offline and sends answers when signal returns.

HOW IT WORKS

1 A ministry joins

Join at jfindx.org, then sign in with your ministry email — no password. Your organisation gets its own branded survey and dashboard.

2 Consent comes first

Confirm consent for your organisation, then for each survey you send — including how parental consent was gathered for 13–17s. No consent, no participation.

3 Start a survey for each group

Choose the J12 or the Full survey, add your own welcome and closing, and set when it opens and closes. Each one has its own results, adding up into your whole organisation.

4 Young people answer

They scan a QR code or tap a link, answer in about six minutes, and are told plainly that only grouped results are ever seen. Those not yet following Jesus answer their own path.

5 You read the J12 — live

Your dashboard shows the J12 matrix, the Unengaged matrix and a world heat map. Choose which views your team sees, export your results, and overlay the Collab's pooled picture.

6 Ask what it means

“What does this mean?” sends your question — and the view you are looking at — to a Collab facilitator, who helps turn a score into a changed strategy.

THE PROMISES THE PLATFORM KEEPS

- **Only “those who have completed the Index.”** Results never claim to describe a whole population, and every score shows how many people it rests on.
- **Nothing small enough to point at a person.** A score appears at 10 people; a city or area at 400; a country on the map at 2,000.
- **Aggregates only.** No organisation ever sees an individual's answers — including its own young people's.
- **Kept only as long as needed.** After 60 days the exact time, city, typed answers and survey link are removed; cleaned answers are kept up to 5 years, then only grouped totals. Under-13s are stopped at the first question and nothing is kept.
- **Minors protected at the edge.** Consent, including parental consent, is gathered and held by each ministry — never by the Index.
- **Your brand, not ours.** Respondents see your name, colour and logo; the Jesus Index sits quietly in the footer.
